

## Close, open, and recognizable

### Our mission

We administer SABIC's pension scheme in the Netherlands. Within the chosen risk attitude, we strive for the best possible pension results for our members and ensure members are well informed and supported in their pension choices.

### Our vision

Both our members and social partners have confidence in how we administer the pension schemes. The fund itself also remains close to its members and achieves the best possible pension results. We respond to social changes and inform our members proactively and clearly through various means of communication.

### Core beliefs

We are close to our members, are recognizable, and easily approachable.

We achieve optimal results for members in combination with acceptable costs.

Administering means making choices. In doing so, all interests are assessed equally.

We improve the satisfaction of all stakeholders through proactive, transparent, and clear communications.

Social Partners consider us as the preferred partner to implement their pension agreement.

Responding to social developments helps realize the members' objectives.

We have integrity and expertise, are diverse, and provide good representation to all our stakeholders.
